COURSEWORK

UNDERGRADUATE
Analysis and Design of Algorithms
Data Structures
OOPS in Java
Computer Networking
Operating Systems
Database Management Systems

SKILLS

LANGUAGES
Familier:
Rust • C/ C++ • Golang • Java
Beginner:
Lua • OCaml • SQL
MySQL • Python

TECHNOLOGIES
Proficient:
unix • nvim • C++STL • Git • GitHub • Googling • iTerm2
Familiar:
Figma • Flutter • Gimp • Docker

EXTRACURRICULAR

ISSA | Technical Team Lead
Organized technical events on new technologies: yew, leptos, shardium.

Open Source Contributor | Mutiple Projects
Contributed to multiple projects (**46**) aligned with my interests in technology.

EXPERIENCE

QDRANT | Open Source
Mar 2023 - Present

- Fixed ***.proto files**, ensuring error-free and robust implementation.
- Expanding support for additional distance metrics: **"hamming distance and jaccard distance"**.
- Implementing **SIMD optimization** for hamming and jaccard distance calculations.

RUSTAPI | Open Source
May 2023 – June 2023

- Implemented **rust-pretty-assertion-library** throughout rustapi codebase.
- Tested working of pretty assertions on **RUSTAPI** and ensuring library working correctly.

DEV GENIUS | Writer
Jun 2022 – Dec 2022 | Remote, India

- Published **20+** articles on Dev Genius @Medium with a read ratio of **74%**.

LOGROCKET | CABM
April 2023 – Present

- Member of content advisory board at LogRocket.
- Reviewed PodRocket podcast and technical articles submitted by various writers on LogRocket platform, providing feedback on technical accuracy and clarity.

PROJECTS

SYMMETRICAL-PALM-TREE |
symmetrical-palm-tree Aug 2022 – Sep 2022 | Remote, India

- **Realtime high fidelity chat application (yt link)** in Rust using Rocket framework.
- Create using **tokio** and serde, a bounded, multi-producer, multi-consumer channel where each sent value is broadcast to all active receivers.
- Was able to handle up to **10,000** concurrent requests/sec on single machine.

REIMAGINED-OCTO-GIGGLE |
reimagined-octor-giggle Mar 2022 – May 2022 | Remote, India

- Create library API in Go using **Gin** framework.
- High performance, can handle upto **100,000** requests/sec on single core and **1 million** requests/sec on four-core machine.

GUESS-WHO-S-BACK- |
Guess-Who-s-Back- Dec 2021 – Dec 2021 | Remote, India

- **CLI** game build using rust, users can play the game against the computer or against each other.

AWARDS

2021	1st	IEEE Premier League (IPL) Coding Competition
2018	4th	SGFI Under-19 Aquatic Championship
2016	1st	Delhi State Aquatic Championship
